- Radio Gold Mine
- Orinoco Gold, Brazil
- Sukari Hills, Egypt
- British King Gold Mines
- Norseman Gold
- Tanami Gold
- Morning Star Gold Mines
- Western Mining Pty Ltd

Australian Resources Contracting (ARC) is an Australian based narrow vein mining contractor that specialises in the mining of high grade narrow vein ore bodies throughout the world.

Our expertise is the knowledge and experience to safely develop and implement stoping techniques where mine owners are seeking to minimise the dilution of their high-grade ore zones.

ARC can offer a full service to clients from initial mine design and engineering through to full project management and or sub-contracting to mine owners and larger contractors who have lost this valuable narrow vein skill set.

OUR SERVICES AND EQUIPMENT

ARC has been involved in narrow vein mining for over a decade with our Managing Director having over 20 years involvement in narrow vein underground mining. Our skill set, and expertise is the safe mining of narrow vein ore bodies through the use of Air Leg mining techniques and Single Boom Jumbo's. ARC can provide clients with Air leg miners to develop Slot and Escapeway Rises and installation of Escapeway Ladders. ARC is also one of the few mining contractors with experience with shafts and rail mining in Australia.

ARC has a fleet of specialized well maintained underground narrow vein mining equipment. This equipment is available for short or long term hire and can be supplied with highly skilled operators and maintenance if required. We have Single Boom Jumbo's and small to mid-sized LHD's and Trucks. Please see our website for a full list of our equipment. www.ausrescon.com.au
