

The logo for Bend-tech features the company name in a bold, italicized, dark blue font. The letter 'B' is stylized with three horizontal green dashes extending to the left. The tagline 'ENGINEERED TO DRIVE EFFICIENCY' is positioned below the company name in a smaller, green, all-caps sans-serif font. The background of the entire image is a white-to-light-gray gradient with a complex, geometric wireframe pattern of interconnected lines and polygons, and several thick, parallel green diagonal lines crossing the scene from the bottom-left towards the top-right.

“ Making maintenance on-site safe, efficient and easy ”

- Global providers of mining and engineering products, services and solutions
- 30 years of custom, intelligent, certified and compliant design, engineering and construction
- Australia-wide locations means convenience and closest point of contact and supply for customers
- Continually maximising on-site safety, efficiency and productivity
- All safety systems, industrial solutions and steel products have full certification and compliance with Australian Standards

about us

We deliver sustained value by providing cutting-edge solutions through collaboration and innovation. For more than 30 years we have delivered intelligent design and custom-certified products and services to the Mining, Fabrication, Marine and Oil and Gas industries across Australia and around the world. We have achieved this through a deep understanding of our customers and their requirements as well as innovative and industry leading design, engineering and construction.

We enable high performance and efficiency outcomes across any industry we are involved in. Our safety systems, industrial solutions and steel products have full certification to ensure compliance with Australian Standards. We deliver sustained value and a high-quality experience through constant innovation and collaboration. Internally and externally we develop relationships and understanding that puts our thinking ahead of the curve. We stay in front of problems and ready ourselves with technology and processes to provide the outcomes our global client base needs. Our people are what sets us apart, organisation-wide adoption of our culture and commitment to the customer is why we have such long and loyal relationships with suppliers, contractors and our customers.

Director

Paul Fawkes is Production Manager of Bend-tech Group. Having joined the business 28 years ago, Paul oversees the project management, quality control, sourcing and supplier management. This includes ensuring that Bend-tech Group is in a league of its own by delivering certified and Australian-engineered safety systems, industrial solutions and steel products.

“ I want Bend-tech to continue to grow and expand across industry. To establish ourselves as the market leader in providing a wide range of innovative solutions using cutting edge service and technology. ”

Kelvin Dowell - With over 15 years' experience at Bend-tech Kelvin has been solving customer problems for a long time. Kelvin thrives on the challenges that the industry throws at him. Providing him the opportunity to showcase Bend-techs capabilities and that there is a way to make it work.

“ My vision for Bend-tech is for unprecedented growth and profitability. Being the first point of call for the Asia Pacific's mining sector for challenges in safety, efficiency and innovation. We want to be an industry leader and source of knowledge. ”

Sales Manager

our process

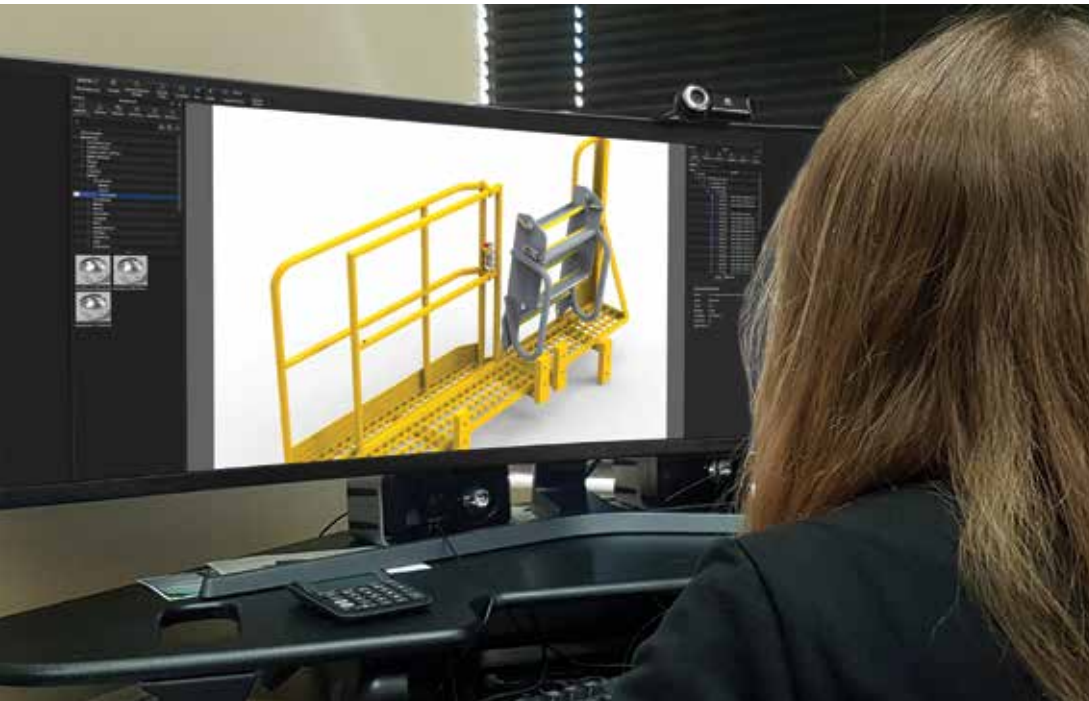

Bringing the solution to you streamlines results

Allowing for easy communication of your problem and the ability to discuss solutions in real-time. Our sales and consulting team have unrivalled experience and provide hands on expertise when developing solutions for our customers. Site visits allow us to discuss projects and develop a greater understanding of what is required. We take measurements, discuss characteristics and conceptualise viable solutions. Whether it is over the phone or face to face, our process starts here, learning as much as we can about our customers and the services they need.

“Our holistic approach solves client problems”

Developing and certifying your solution for compliance

We have control over the entire design and engineering process and ensure it provides the intended value and performance. Our extensive team of first class designers, 3D modellers and engineers lead the way in innovation and technical expertise. We create bespoke designs that are certified and hold full compliance with Australian Standards. We involve our customers in the conceptual process, ensuring the design meets requirements, leading to a faster, more streamlined result.

Manufacturing standard or custom products for performance

Our team of highly skilled and experienced fabricators, machine operators and first-class coded welders manufacture our high-performance products. We only use top of the line machines, materials and equipment for high efficiency, safety and quality outcomes. Every process is quality controlled to ensure our customers receive the highest quality product, providing them with the greatest value and promised solution.

our **services**

mobile **equipment** maintenance

Our mobile equipment range is constantly growing. We have an extensive range of MEM products servicing all access and maintenance requirements for a variety of machines. Our capabilities enable us to develop solutions for any requirement, and we are constantly developing new solutions and products.

our range includes:

- Access platforms
- Ladders
- Guards
- Steps
- Brackets
- Covers
- Maintenance tooling
- Wear parts
- Panels
- Fasteners
- Handrails
- Work stands

oem replacement parts

Our OEM parts are engineered tough, certified and often incorporate improvements over the original part. They are stocked and ready for immediate despatch. We are always looking to expand our range and we encourage our customers to provide us with the OEM part number they require and we can take care of the rest.

our range includes:

- Handrails
- Doors
- Bumpers
- Dog bones
- Guards
- Ladder parts
- Fenders
- Panels
- Pins & bushes
- Wheel guards

fixed plant

Our fixed plant products increase safety and productivity measures on-site. We have developed a wide variety of products for a range of applications. Innovation has allowed us to improve and streamline processes providing our customers with greater value and a safer site.

our range includes:

- Access Platforms
- Chute Doors
- Conveyor Solutions
- Handrails
- Scaffold Elimination
- Lifting Equipment
- Guarding
- Steel Supply
- Wear Plates
- Work Platforms
- Work Stands

“Expertise,
understanding
and workmanship
drives our service”

bending / rolling

Our extensive experience in bending and rolling dates to when Bend-tech began operation. We have completed bending works for heat transfer, slurry lines, sub-sea power transfer and high-pressure fluid conveyance. Our 200 NB x 12mm wall pipe bender now makes us one of the largest, low cost and efficient pipe benders in Australia.

We can bend round, square, rectangular, oval or specially shaped tube or pipe. Our state of the art CNC machinery ensures that even complex multi-plane configurations are produced exactly to tolerance, every time.

We can roll standard structural shapes such as pipe, angle, flat, channel, UB's and UC's, as well as a broad range of aluminium extrusions. We're experienced rolling spirals, cones, ellipses, and have the expertise to take on an extensive range of complex geometric shapes.

“ Our processes, and our people provide each of our customers an unrivalled experience and service that doesn’t end at solution delivery ”
