

# Driving Innovations & Increasing Productivity

Together We Thrive

## INTRODUCING CCR HOSE & FITTINGS PARTNERSHIP WITH GATES

Working with quality partners is critical to success. Gates and CCR Hose and Fittings have joined forces to provide customers with an innovative solution to maintain heavy mining equipment hydraulic hose assemblies on site including:

- Cutting edge RFID hose tracking technology and preventive maintenance programs
- Achieving up to 96% planned maintenance on mine sites that we service
- Delivering significant reductions in production cost
- Preventive Maintenance Technicians that have the experience to establish the root cause of hose failures
- 50% reduction in machine down time due to hose failure
- Onsite Hose Manufacturing workshops
- Hose Auditing

## THE STRONGEST PARTS FOR YOUR WEAKEST LINKS

When wasted seconds mean wasted money, you need to power your mining operations with equipment you can count on. Gates complete line of hydraulics, hose, couplings and capital fabrication equipment i.e. cut off saw and crimpers ensures your mine can keep up with demand.

We are committed to providing businesses working in the mining industry with complete end-to-end matched system solutions with our hose, coupling and crimpers to ensure world-class leak-proof assembly performance.

Gates parts not only dramatically improve uptime, they also come backed by services designed to help you reduce inventory expenses, get replacement parts faster, and improve safety.
