WA Heavy vehicle accredited (WAHVA)
AS-NZS 4801:2001

Hampton Transport Services Pty Ltd is a privately owned and operated company who have been in business since 1977. In 2003 Hampton Transport added Hampton Mining and Civil division to their company and began offering mining, heavy haulage, drilling, potable water, ore haulage & crushing and screening services. Hampton mining division has an excellent record in establishing infrastructure and operating efficient and economical mines.

On Thursday the 23rd of October 2014, Hampton Transport Services Pty Ltd formally completed its Stage 2 certification audit to Australian Standard 4801 (occupational health and safety management systems). Hampton Transport is certified for a wide range of business activities. Activities under the scope of the certification are as follows:

- Provision of Open pit mining, Bulk haulage, civil earthworks, haul road construction.
- Transport of class 3 Dangerous Goods
- Maintenance of Mobile Equipment

Load & Haul

Hampton has a modern fleet of excavation equipment, enabling flexibly to mine a variety of projects. Hampton fleet consists of:

- Front end loaders
- Dozers
- Graders
- Rollers
- Excavators 90t/120t/150t
- Dump trucks 40t/100t
- Water carts

The most common services we provide are 45 and 90 tonne excavators with a 40 tonne articulated dump truck fleet, and 120 and 150 tonne excavators with a 100 tonne dump truck fleet.

Drill & Blast

Operating a fleet of Sandvik top-hammer drill rigs, we are equipped to cover all drill and blast requirements. Every drill and blast outfit is operated by experienced company-employed personnel.

Our team consists of experienced drillers, shot firers, blast crew and drill and blast engineers. This dynamic mix gives our company the flexibility to cater for all drill and blast applications.

Crush & Screen

Hampton has a team of experienced personnel dedicated to mobile crushing and screening services. We cater for the needs of mining clients with emergency mill feed and general screening. We can provide road base and aggregate products. The fleet of track mounted mobile equipment allows us to offer cost-effective solutions for a broad range of projects at a short lead time.

Material Handling

Hampton has been offering ore haulage services to clients for well over 20 years, including current and past major contracts in Western Australia and the Northern Territory.

Working closely with tipping equipment manufacturers, Hampton units are designed to the specific requirements of individual clients.

We offer a cost-effective haulage solution, satisfying local and state government operating standards.

Earth Moving & Civil Service

Hampton civil services division caters for

- Mine haul road construction
- Mine site establishment
- Road maintenance
- Civil earthworks including treatment plants, air strips and hardstand areas
- Grading of roads, fence-lines, grid-lines and fire-breaks
- Rock breaking
- Mill and crusher feeds
- Construction of tailings dams
- Construction of water dams, pipeline bund walls and scour pits

Various fleets of equipment can be brought together anywhere in Australia to complete required works, large or small.

Ore Haulage

Being specialists in remote area transport, Hampton conducts some of the most difficult bulk haulage transport contracts, regularly overcoming variables such as distance, maintenance and supply - issues relevant only to remote areas of Australia. To shorten delivery times, Hampton will negotiate on your behalf with local authorities to arrange concessional public road loading rates.

Wherever the mine site and whatever the terrain, Hampton Transport will devise the most reliable and cost-effective and dependable method of transport.

Heavy Haulage

Hampton will transport heavy earth-moving equipment and any large loads such as tanks, drills and infrastructure to any site in mainland Australia.

Hampton heavy haulage department operates floats from 25 to 134 tonne capacity, including a 7 line platform with dolly. Our heavy haulage prime movers are all equipped with satellite communication equipment to ensure constant communication with the Head Office.

Hampton has all the equipment to complete a fast and safe transport heavy haulage service, with purpose-designed escort vehicles complete with Hiab cranes and maintenance equipment. Paired with this equipment is an experienced escort crew, ensuring jobs are completed smoothly and efficiently.

Potable Water

Hampton operates potable water deliveries from Kalgoorlie-Boulder to many remote mine sites in the Goldfields region. We can deliver loads from 10,000 litres to a 90,000 litre triple road train. Mines can be hundreds of kilometres from the nearest town, so a precise and reliable service is vital. Hampton potable water division is a service you can rely on.
